### 181 [Papers: Modularizing codescriptive grammars for efficient parsing](#)

Walter Kasper, Hans-Ulrich Krieger

 August 1996 **Proceedings of the 16th conference on Computational linguistics - Volume 2**
**Publisher:** Association for Computational Linguistics

 Full text available: [pdf\(607.04 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#)

Unification-based theories of grammar allow to integrate different levels of linguistic descriptions in the common framework of typed feature structures. Dependencies among the levels are expressed by coreferences. Though highly attractive theoretically, using such codescriptions for analysis creates problems of efficiency. We present an approach to a modular use of codescriptions on the syntactic and semantic level. Grammatical analysis is performed by tightly coupled parsers running in tandem, ...
